

Attaching a Video Clip to a QR Code Using an iPad

- Create a Dropbox Account.
- Install the Dropbox App on your iPad. When you download this app, allow it to upload your pictures.
- In your iPad “Settings”, under “Privacy”, then “Photos”, make sure Dropbox is turned on.
- Use your iPad in camera mode to record videos. These videos will automatically go to your Dropbox account.
- Once you are done recording your videos, move to a laptop/desktop.
- Go to the Internet and login to your Dropbox account. If you downloaded Dropbox onto your computer, you can click on the blue Dropbox icon on your desktop or in the lower right corner on your screen.
- Once in Dropbox, click on “Camera Uploads.”
- Click on the video.
- A screen will pop up asking you to name the video and a box will pop up allowing you to share the link. Click on this choice.
- You now have a link to put into a free QR Code generator! Yes, it is that simple! Have fun!
